Bose companion 2 series iii alternative. Bose companion 2 series iii release date. Bose companion 2 series iii price. Bose companion 2 series iii specs watts.

Instead, the aim is simply to provide an enhanced listening experience from devices that are typically equipped with marginal built-in speakers. The first word that came to mind was friendly. The overall sound was pleasing and easy to listen to, with a solid stereo image and a surprising amount of volume available from the large control knob on the right speaker. However, the magnetic field around the speakers is not strong enough to harm data on most magnetic storage media. A stereo minijack headphone output resides below the knob for those times when you need to keep your listening private. Everyone says its expensive, take your time, save a little and you will enjoy the great sound, its worth the money you pay for. I love good quality sound and it took me a while to save enough to buy these speakers, I have no regrets buying them and they are the jewels in my house. I like the sound from the speakers, its really awesome. There are a little bit expensive, and it take me a while to save enough to buy it. No. The speakers are not magnetically shielded. Use the auxiliary input to bring Bose performance to another audio source such as your iPhone or iPad. Yes. Portable and deceptively powerful. That's why I was eager to give the Bose Companion 2 Series III multimedia speaker system a try. Its one of the better speakers in the market, awesome sound, the technology that goes in to make this speaker is fantastic, if you hear it once, you would not like to listen to another speaker, its that good. Plus, an additional 3.5mm minijack stereo input made it easy to plug in my smartphone or tablet for a quick injection from my music library. They run off AC power, and three wired connections are all it takes to get you going. I was struck by the fact that the bass was a lot fuller than I would normally expect for a pair of personal computer speakers, and that the first impression was one of rounded warmth.
